

Circular 4 of 2007

Methyl Bromide fumigation is prohibited

Dear friends,

We have received a notification from APEDA that Methyl Bromide fumigation of wooden pallets and empty containers is not possible any longer. Kindly refer to the attachments.

We request you to comply with this requirement immediately and submit a copy of the certificate/document on hot air treatment along with the request for the Export Certificates.

Thank you for your co-operation.

Yours sincerely,

Umesh Chandrasekhar,
Director
